WELCOME...

Welcome to 20th Annual

Winter - Long and Cold

Spring - Must have missed it.

Summer - Hot and Dry

Fall - Looking out the window, Snow October 2nd

We feel both honoured and excited to be hosting our 20th Annual Sale. The many friends and relationships we have developed over the years have been very rewarding.

We focus on delivering sound, low maintenance, fertile cattle that can service and do well in a cost effective market. We are confident that our cattle can benefit your operation.

The use of Embryos, AI and the best walking bulls we can find along with a great set of mother cows make us extremely proud of this set of bulls. Take advantage of our generations of tough selection. No bulls have been held back this year.

We know your schedule is very busy but hopefully you can take time to spend November 16th with us. We serve our customary lunch before the sale but your welcome to our hospitality all year long.

The Pahl Families

PS If you have any questions about the sale offering, please don't hesitate to call Dan at 403-548-1614 or Scott at 403-580-9908.

Raising Bulls at Pahl Livestock

Bulls here are raised strictly with natural growth and longevity in mind. Lots of bulls are fed in large pens but ours are fed in an approximately 50 acre pen with the feed and the water as far apart as they can be, forcing the bulls to walk miles a day. They are fed a textured grain ration designed for skeletal growth and development, as well as a custom mineral to help with fertility, and free choice dry hay. The whole sale group is fed in two pens letting the better bulls rise to the top. Bulls are then sorted and the bottom is culled after each weigh date and again in September before the sale for temperament. There are no bulls sold from this pen before the sale. These bulls are raised to be sound and guaranteed breeders.

HOW MUCH CAN YOU AFFORD TO PAY FOR A TOP BULL?

COWMAN FORMULA

Increase in pounds per calf from a top-performance bull
 X No. of cows bred to him per year
 X No. of years to keep the bull
 X Expected selling price of calves
 = Additional dollars you can pay for a better bull

Example: A bull who will add 30 lbs. to the weaning weight of each of his calves mated to 25 cows per year for 4 years and you sell the calves for \$1.80 per pound.

$$30 \times 25 = 750 \times 4 = 3000 \times 1.80 = \$5,400$$

This is worth \$5,400 more than the average bull who will keep your weaning weights the same. Take this formula and put our own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving-ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.

Dam to 254E

The Weiser/Iron Mountain cross looks like it's really going to work. 107C is a very pretty first calf heifer that shows a ton of promise. 197W had a feature bull going to Lazy H Ranch in 2014 and 4 heifers all retained in herd.
